

# Make the Most of Your Microsoft Investment with Support from an Award-Winning Microsoft Partner

Microsoft technology powers more than half of all global businesses that work in a cloud-based environment, but many business users aren't taking full advantage of the products they're already paying for.

Bulletproof has been honing our Microsoft expertise, security skills, and compliance practices for over 20 years. Our services were built on the foundation of Microsoft's suite of products and our Microsoft Verified Managed XDR Solution is backed by a world-class in-house SOC.

As Microsoft's global 2021 Security Partner of the Year award winners with Microsoft Solutions designations in Security and Modern Work, we know how to make your Microsoft investment work for you.

***“Bulletproof is doing an exceptional job of listening to their customers and then going above and beyond to provide them with services to unlock all the value of their Microsoft Security investment. They are able to see the value of our Microsoft security platform and have built a managed SOC service that is driving significant customer value, allowing their customers to remain focused on their business.”***

Julie Jeffries, Modern Work & Security PMM Manager,  
Microsoft Canada

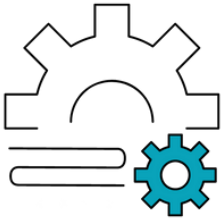

## How to Choose the Right Microsoft Partner to Work With

Working with a Microsoft Partner for implementation, optimization, and ongoing support can help you maximize ROI in your Microsoft environment.

Microsoft Partners provide end-to-end support, including requirements and infrastructure planning, cost optimization, strategic deployment and onboarding, user training, and ongoing consultancy.

The right Microsoft Partner can provide clear and straightforward advice about product selection, implement your Microsoft products to the highest standards, directly manage licensing on your behalf, and make sure you're set up for long-term success with your enterprise software purchase.

## Getting Started: Optimize Your Deployment with Custom Microsoft Workshops

Shine a light on your organization's specific requirements and bring all your stakeholders to the table to ensure your Microsoft solution doesn't just work, but it empowers your business to be more competitive, more agile, and more responsive with a multi-day workshop designed to help new and existing Microsoft customers make the most of their technology deployment.

The workshops are delivered by trusted Microsoft partners like Bulletproof and are free to qualifying organizations.

### Secure Identities & Access Workshop

Our experts will help you find identity risks happening now in your environment, gain insights on your application landscape, and improve your identity security posture.

### Mitigate Compliance & Privacy Risks Workshop

This workshop will demonstrate how Microsoft Purview can help your organization detect, investigate, and take action to mitigate risk and ensure compliance in your modern workplace.

### Protect and Govern Sensitive Data Workshop

Protecting information—wherever it goes—is critical to ensuring trust and meeting compliance requirements. Learn how to understand and mitigate hidden privacy and regulatory risks within your own environment with Microsoft Purview.

### Defend Against Threats with SIEM + XDR Workshop

Gain visibility into immediate threats across email, identity, and data and demonstrate how Microsoft Sentinel and Microsoft 365 Defender help organizations use intelligent security analytics and threat intelligence to detect and quickly stop active threats.

**Bulletproof 365 Enterprise: Intelligent Security Powered by Microsoft 365 & Microsoft Sentinel**

**Bulletproof 365 Compliance: Managed Information Protection Service**

**Bulletproof 365: Turnkey Outsourced IT That Combines Microsoft 365 + IT Service Desk + Employee Education**

## GOT MICROSOFT? GET BULLETPROOF.

In today's landscape, your business's technology requirements and security concerns are constantly evolving, so how can you ensure that your tech stack is empowering you forward, not holding you back?

You want to make sure that your Microsoft investment is getting you the returns you need and we're here to help. Our Microsoft consulting, engagements, and managed services are designed for customers who are investing in and putting their productivity and server workloads into the cloud. Organizations need that next level of cloud security, and Microsoft has done a great job of providing all the security tools inside their stack.
